

ANISH MALL

FULL STACK WEB DEVELOPER

CONTACT

- +91 9510779387
- anishmall3879@gmail.com
- Chennai, India
- <https://anish.is-a.dev>

SKILLS

- HTML
- CSS
- React, Next.js, Vite.js
- MongoDB
- MySQL
- Node.js
- Express.js
- Git and Github
- DSA in C++

PROGRAMMING

- Python
- C
- C++
- Java
- JavaScript / TypeScript

PROJECTS

- Built a **Zero-Trust ICS Gateway Simulator** with post-quantum Kyber authentication, real-time access logging, and rogue-node detection using Flask.
- Developed a **secure real-time chat app** with WebSockets, OTP login, online status tracking, and message scheduling.
- Created a **full-stack Airbnb clone** featuring property listings, user authentication, reviews, and an interactive map interface.

PROFILE

I'm a passionate Full Stack Web Developer who loves turning ideas into real-world projects. Currently pursuing B.Tech CSE at SRMIST, with strong DSA and growing interest in cybersecurity. I enjoy hackathons, team projects, and building impactful, practical solutions. Always eager to learn new technologies, collaborate, and share knowledge. Driven to create meaningful projects that make a real difference.

WORK EXPERIENCE

- Spazorlabs

OCT 2025 - PRESENT

Frontend Developer

 - Develop and implement user-focused frontend features for web applications using React, Next.js, and Tailwind CSS.
 - Collaborate effectively with team members to build responsive, scalable, and visually consistent user interfaces.
 - Ensure design and component consistency across all frontend modules to maintain a seamless user experience.
- FOSS Club SRMIST

SEP 2025 - PRESENT

Technical Team Member

 - I learned and built backend systems using the MERN stack, gaining hands-on experience with APIs, databases, and server-side logic.
 - Applied these backend skills in personal projects, contributing to functional and scalable web solutions.
- Codenex Club SRMIST

AUG 2025 - PRESENT

Associate Web Dev Team Member

 - Focused primarily on frontend development, creating responsive and user-friendly web application interfaces.
 - Collaborated with team members to translate designs into clean, efficient, and production-ready UI components.
