

ANISH MALL

FULL STACK DEVELOPER

CONTACT

- +91 9510779387
- anishmall3879@gmail.com
- Chennai, India
- <https://itzanish.is-a.dev>

SKILLS

- HTML, CSS, JS/TS
- React, Next.js, Vite.js
- MongoDB, MySQL, PostgreSQL, Prisma
- Node.js, Express.js, Bun, FastAPI, Flask
- Docker, Kubernetes, AWS
- Scikit-Learn, Matplotlib, Pandas, Numpy, XGBoost

PROGRAMMING

- Python
- C, C++ (DSA)
- Java
- JavaScript / TypeScript

ACHIEVEMENTS

- Barclays Summer Intern 2027; Top 48 Finalist - Hack-O-Hire
- 3rd Place - Ossome Hacks 3.0; Top 60 - HackSky'25
- Rank 274 - TryHackMe Industrial Intrusion CTF
- Certifications:** AWS Developer Associate, Fortinet FCF & FCA, NPTEL (OODP, Programming in Java, Cryptography & Network Security)

EDUCATION

B.Tech C.S.E w/s in Cyber Security

SRMIST (2024-2028) | 9.93 CGPA

XII PCM [CBSE]

Lions English School (23-24) | 90%

X [CBSE]

Lions English School (21-22) | 95.6%

PROFILE

I'm a passionate Full Stack Developer who loves turning ideas into real-world projects. Currently pursuing B.Tech CSE at SRMIST, with knowledge of DSA and growing interest in cybersecurity. I enjoy hackathons, team projects, and building impactful, practical solutions. Always eager to learn new technologies, collaborate, and share knowledge. Driven to create meaningful projects that make a real difference.

WORK EXPERIENCE

Spazorlabs

OCT 2025 - FEB 2026

Full Stack Developer

Developed production-ready full-stack web applications using React, Next.js, Tailwind CSS, Node.js, PostgreSQL (Prisma), and MongoDB, collaborating with cross-functional teams to deliver responsive user interfaces, seamless frontend-backend integration, scalable architectures, and high-quality client solutions.

FOSS Club SRMIST

SEP 2025 - PRESENT

Technical Team Member

Learned backend development using the MERN stack while exploring FOSS practices, workflows, and collaborative development principles

Codenex Club SRMIST

AUG 2025 - PRESENT

Director of Web Development

Contributed to club projects as a Full Stack Developer, building responsive web applications and production-ready components, while organizing hackathons, conducting technical workshops, and fostering collaborative learning within the developer community.

HackerRank Campus Crew SRMIST

MAR 2026 - PRESENT

Technical Head

PROJECTS

- Built and deployed full-stack clones of Airbnb, Zerodha, Zoom, LinkedIn, and a Git-based Version Control System using Next.js, Node.js, Express, TypeScript, MongoDB, WebSockets, JWT Authentication, and REST APIs.
- Developed Sentries, an enterprise-grade RBAC and security monitoring platform with role-based access control, audit logging, authentication monitoring, IP blocking, alert management, security dashboards, and real-time administrative workflows.
- Engineering an AI-powered 3D mesh optimization platform that transforms high-polygon AI-generated assets (Tripo3D, Meshy, Shap-E) into production-ready models (under research).
- Built security-focused systems including a Zero-Trust ICS Gateway with post-quantum Kyber authentication, rogue-node detection, real-time access logging, and Revio, a customizable event management platform with advanced workflow automation beyond Devfolio and Unstop.
